**MG SYSTEMS**  
MENOMONEE FALLS, WI, U.S.A.

MG Systems announces a new option for its workhorse cutting machine, TMC4500 ST. It's a new drill that will improve productivity. More work will be done in a single handling. This new heavy-duty drill makes holes up to 2 inches in diameter and has a 36 hp motor and tool storage for 12 tools.

Also available for the TMC4500 ST cutting machine is the Rotator Infinity, which provides precision bevel Plasma cutting. This heavy-duty torch cuts various angles for welding preparation.

Visit MG Systems at [www.mg-systems-welding.com](http://www.mg-systems-welding.com) to see the possible productivity gains with MG Systems equipment, or contact MG Systems for assistance with your plate-processing needs.
