

Dual Hi-Lo

Manual Gas Control System

OVERVIEW:

The Dual Hi-Lo provides manual gas control for oxyfuel cutting. For use by experienced operators, the Dual Hi-Lo provides economical gas control and setting for all parts of the oxyfuel cutting process.

FEATURES AND BENEFITS:

- Regulates the pre-heat, flame, piercing oxygen, and cutting oxygen during oxyfuel cutting with Messer TurboFlame torches
- Controls pierce rate control
- Adjustable for various material thicknesses

SYSTEM DESCRIPTION:

The Dual Hi-Lo is a manual gas control console for experienced operators. It controls high and low preheat fuel, cutting oxygen pressure, high and low preheat oxygen pressure, and the speed of the pierce rate.

APPLICATION:

Available on EdgeMate, EdgeMaster, MPC2000, Titan II, and TMC4500ST machine models.
